Test Case ID	Test Case Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Results	Status (Pass/Fail)	Severity	Priority	Comments / Evidence
TC-ADD-01	Verify product cards are correctly rendered	User is on the Products page	1- Open the Products page. 2- View the product grid. 3- Inspect each visible product card	Products page with available products.	Each product card displays: 1-Product name 2- Price in Egyptian Pounds (ج.م) 3-Visual representation (emoji/image) 4-"أضف إلى السلة" button.	1-Product name 2- Price in Egyptian Pounds (ج.م) 3-Visual representation (emoji/image) 4-" أضف إلى السلة" button.	Pass	High	High	
TC-ADD-02	Verify adding a new product to the cart	1-Product Page is opened. 2-Cart is empty.	1-Products Page 2-go to the product 3-Click إضافة الي السلة	هاتف ذكي سامسونج	1-Product added in card and quantity =1 2-Cart badge in the header increases by 1 3-Button shows temporary success feedback	1-Product added in card and quantity =1 2-Cart badge in the header increases by 1 3-Button shows temporary success feedback	Pass	Medium	High	
TC-ADD-03	Verify adding the same product again increases the quantity	1-Product Page is opened. 2-The product is already in the cart with quantity = 1	1-Open the Products page. 2-Select a product. 3- Click "أضف إلى السلة". 4-Click " أضف إلى السلة" again for the same product. 5-Open the cart. 6Verify the product quantity	Product that already exists in the cart 2 هاتف ذكي سامسونج	1-Product quantity increases to 2 – 2-Cart badge increases by 1 – 3-Button shows temporary success feedback	1-Product quantity increases to 2 2-Cart badge increases by 1 3-Button shows temporary success feedback	Pass	High	High	
TC-ADD-04	Verify cart badge shows the total	Cart is empty	1. Add once هاتف ذكي سامسونج	هاتف ذكي سامسونج +هاتف ذكي سامسونج	Cart badge displays 2	Cart badge displays 2	Pass	High	High	

	quantity of all items		2. Add the same product							
TC-ADD-05	Verify cart data remains after refreshing the page	Any product find in the cart	1- Add a product to the cart 2- Refresh the page 3- Check the cart badge and cart content	products already in the cart	1-Product stays in the cart 2- Cart badge shows the same number 3- Data is still saved in localStorage	1-Product stays in the cart 2- Cart badge shows the same number 3- Data is still saved in localStorage	Pass	High	High	
TC-ADD-06	Add product to cart as anonymous user	User is not logged in (guest)	1-Open products page. 2- click any product إضافة الي السلة	Any product	1- Product is added successfully 2- Cart badge is updated	عند الضغط علي إضافة الي السلة ظهر يجب تسجيل الدخول أولاً لإضافة منتجات إلى السلة	Fail	High	High	
TC-ADD-07	Verify no JavaScript errors occur when adding a product to cart (Anonymous user)	User is not logged in (guest)	1-Open products page. 2- click any product إضافة الي السلة 3- هنشوف الconsole	Any product	There no JavaScript errors	There no JavaScript errors	pass	low	Medium	
TC-ADD-08	Verify no JavaScript errors occur when adding a product to cart (logged-in user)	User is logged	1-Open products page. 2- click any product إضافة الي السلة 3- هنشوف الconsole	Any product	There no JavaScript errors	There no JavaScript errors	pass	low	Medium	
TC-ADD-09	Verify logged-in user can add a product to cart	User is logged in and is on the Products page	1. Open Products page. 2. Select any product. 3. Click "أضف إلى السلة". 4. Open the cart	Any product	Product is added successfully to the cart, quantity = 1, cart badge is updated, and temporary success feedback appears	Product is added successfully to the cart, quantity = 1, cart badge is updated, and temporary success feedback appears	Pass	High	High	

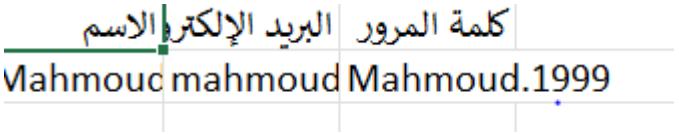

TC-ADD-10	Verify layout	Products page is opened.	1- Open the Products page on a desktop viewport. 2- Change the browser viewport to a mobile size 3- Verify the product cards and buttons remain visible and usable	Desktop viewport and Mobile viewport	1-The layout is responsive on mobile 2- Product cards remain readable and usable 3- Buttons remain visible and clickable	1-The layout is responsive on mobile 2- Product cards remain readable and usable 3- Buttons remain visible and clickable	pass	Low	Medium	
TC-ADD-11	Verify the system handles localStorage unavailability gracefully	1- User is on the Products page. 2-localStorage is unavailable/blocked.	1- Disable/block localStorage using the browser Console. 2-Click **" أضف إلى السلة"** for a product. 3- Observe the system behavior. 4- Check the browser Console for JavaScript errors.	Any product	The system handles localStorage unavailability gracefully without crashing or displaying JavaScript errors.	A JavaScript error Uncaught Error: localStorage disabled was displayed in the browser Console when the system attempted to save the cart.	Fail	Medium	High	The error occurred in saveCart() at app.js:39, which was called from addToCart() at app.js:220.
TC-ADD-12	Verify Add to Cart Works When localStorage Is Available	User is on the Products page and localStorage is available.	1. Open the Products page. 2. Click **" أضف إلى السلة"** for any product. 3. Check the cart badge. 4. Verify the product is stored in localStorage.	Any product	Product is added successfully with quantity **1**, the cart badge is updated, and the cart data is saved in localStorage without any JavaScript errors.	Product was added successfully, the cart badge was updated, and localStorage worked correctly without errors.	Pass	Low	High	localStorage.setItem() and localStorage.getItem() worked successfully.

TC-ADD-13	Verify Add to Cart button is keyboard accessible	User is on the Products page	1. Open the Products page. 2. Press Tab until an "أضف إلى السلة" button receives focus. 3. Press Enter to activate the button. 4. Verify the result.	Any product	The "أضف إلى السلة" button receives keyboard focus and can be activated using the keyboard. The product is added to the cart successfully.	The button received keyboard focus using the Tab key and was activated successfully using the Enter key. The product was added to the cart.	Pass	Medium	High	Verified using keyboard navigation (Tab and Enter).
TC-ADD-14	Verify sufficient color contrast for accessibility	User is on the Products page	1-Open Chrome DevTools → Lighthouse. 2- Select Accessibility. 3-Select Mobile. 4-Run Analyze page load. 5-Check the Contrast section.	Products page	Text and foreground/background colors have sufficient contrast and are clearly readable.	Lighthouse reported: "Background and foreground colors do not have a sufficient contrast ratio."	Fail	Medium	Medium	Lighthouse Accessibility score: **83**. Contrast issue was reported
TC-ADD-15	Verify Add to Cart action completes within 1 second	1-User is on the Products page. 2-localStorage is available.	1- Open the Products page. 2- Click **"أضف إلى السلة"** for a product. 3-Measure the time required for the Add to Cart action and UI update. 4-Repeat the test three times.	Any Product	The Add to Cart action and UI update complete in less than 1 second under normal conditions.	The measured UI update times were 6.20 ms, 1.00 ms, and 0.90 ms, all below 1 second.	Pass	Medium	High	Performance was verified using the browser performance.now() API. All three measurements were below the required 1-second threshold.

TC-ADD-16	Verify success feedback is displayed promptly	User is on the Products page.	1- Open the Products page. 2- Click "أضف إلى السلة" for a product.	Any Product	A temporary success feedback message is displayed within 1–2 seconds after clicking "أضف إلى السلة".	the "تم الإضافة" success feedback message appeared immediately after clicking the Add to Cart button.	Pass	Medium	Medium	

Exploratory Test Cases(NOT PASS)

Test Case ID	Test Case Title	Preconditions	Test Steps	Test Data	Expected Result	Actual Results	Status (Pass/Fail)	Severity	Priority	Comments / Evidence
ETC-01	Verify Product Stock and Availability Handling	User is on the Products page.	1-Check the available stock for a product. 2-Try adding a product when stock is available. 3-Try reaching/exceeding the available quantity. 4-Check the behavior when the product is unavailable.	A / Valid full name	The system should clearly indicate product availability and should prevent adding a product when the available stock is exhausted.	Stock quantity and out-of-stock behavior are not clearly defined/displayed in the tested flow.	Fail	Medium	Medium	Stock/availability requirements are not clearly specified.
ETC-02	Verify Full Name Validation	User is on the form that contains the Full Name field.	1-Enter one character in Full Name. 2- Submit the form. 3- Enter a valid name with more than one character. 4- Submit again.	M / Valid full name	The system should apply appropriate validation rules for the Full Name field.	The system accepts a single character and also accepts names with more than one character.	Fail	Low	Medium	Minimum length requirement for Full Name is not clearly specified.

ETC-03	Verify Password Protection During Excel Export	User has entered account/user information and an export-to-Excel option is available.	1.-Enter a password. 2.-Export the data to Excel. 3-Open the exported Excel file. 4- Check the exported password field.	Test account with password	Passwords should not be exposed in plain text in the exported Excel file.	The password appears in plain text in the exported Excel file.	Fail	High	High	Sensitive password information is exposed in the exported Excel file. 
ETC-04	Verify Cart Behavior After Completing an Order Without Payment	Product is added to the cart and the user can proceed to order completion.	1-Add a product to the cart. 2-Proceed to checkout/order completion. 3-Complete the order without making a real payment. 4- Return to/check the cart.	Any product	The system should clearly handle the order state and should not unexpectedly remove cart items before a valid order/payment process is completed.	After completing the order without payment, the cart becomes empty.	Fail	Medium	Medium	Cart was cleared after order completion without a real payment.

A. Feature: Add to Cart – Products Page

Checklist	Result
Product cards are correctly rendered (name, price, visual, button)	✓ Pass
"أضف إلى السلة" button is present and correctly labeled on every product	✓ Pass
Button is clickable / enabled	✓ Pass
Clicking the button updates the cart badge immediately	✓ Pass
Adding the same product twice increases quantity correctly	✓ Pass
Visual feedback appears after successful add	✓ Pass
Cart data persists after page refresh	✓ Pass
Works for anonymous user	✗ Fail
Works for logged-in user	✓ Pass
No JavaScript errors in console	✓ Pass
JavaScript errors are handled gracefully when localStorage is unavailable	✗ Fail
Add to Cart action completes within 1 second	✓ Pass
Success feedback appears within 1–2 seconds	✓ Pass
Add to Cart button is keyboard accessible	✓ Pass
Sufficient color contrast for accessibility	✗ Fail
Layout remains usable on desktop and mobile viewport	✓ Pass
Other observations – inadequate test case	
➢ Inadequate test case coverage for stock/availability scenarios.	✗ Fail
➢ Password is exposed in plain text in the exported Excel file.	✗ Fail
➢ The Full Name field accepts a single character; the minimum length requirement is not clearly specified.	✗ Fail
➢ Cart becomes empty after completing an order without payment; expected behavior is not clearly specified.	✗ Fail

Test Report – Add to Cart Feature

Tester Name: Mahmoud Bakri , Naswa Nassar , Manar Galal , Ahmed Ramzy

Date:15/9/2026

Environment: Browser: Google Chrome Version: 15.0.8010.37

OS: Windows 10

Build / URL: https://minayounan-cs.github.io/TestLab/products.html

1. Scope

This test covers the Add to Cart feature on the Products page, including product card rendering, adding new products, increasing product quantity, cart badge updates, cart data persistence after page refresh, anonymous and logged-in user behavior, localStorage availability and error handling, keyboard accessibility, color contrast, performance, success feedback, and responsive layout on desktop and mobile.

~~Exploratory testing also covers product stock and availability, Full Name validation, password protection during Excel export, and cart behavior after completing an order without payment~~

2. Test Execution Summary

- Total Test Cases executed: 16
- Passed: 13
- Failed: 3
- Blocked / Not executed: 0
- Pass rate: 81.25%
- **Exploratory Test Cases: 4 Failed**

3. Defects Found

Defect ID	Summary	Severity	Status	Related TC
DEF-ADD-01	Anonymous users cannot add products to the cart. The system displays “ يجب تسجيل الدخول أولاً لإضافة منتجات إلى السلة” instead of adding the product	High	Open	TC-ADD-06
DEF-ADD-02	The system does not handle localStorage unavailability gracefully and displays a JavaScript error	Medium	Open	TC-ADD-11
DEF-ADD-03	Background and foreground colors do not have sufficient contrast according to Lighthouse	Medium	Open	TC-ADD-14

Exploratory Test Case Defects

Defect ID	Summary	Severity	Status	Related TC
DEF-EXP-01	Stock/availability behavior is not clearly defined or covered by the current test cases.	Medium	Open	ETC-01
DEF-EXP-02	The Full Name field accepts a single character, while the minimum length requirement is not clearly specified.	Low	Open	ETC-02
DEF-EXP-03	Password is exposed in plain text in the exported Excel file.	High	Open	ETC-03
DEF-EXP-04	Cart becomes empty after completing an order without payment; the expected behavior is not clearly specified.	Medium	Open	ETC-04
